PROFILE SUMMARY

Software Engineer with hands-on experience in building fast, scalable web applications using React, Node.js, Express.js, SQL, and NoSQL. Skilled at crafting robust RESTful APIs, ensuring secure authentication, and delivering full-stack applications with Render and Vercel. Focused on optimizing performance, reducing technical debt, and collaborating effectively in dynamic Agile teams to drive impactful results.

PROJECTS

OCT 2024 - NOV 2024

PATIENT HUB

- A health app for seamless appointment booking and profile management

DEC 2024 - APRIL 2025

ZLOPAY

- A platform for trading and selling gift cards with secure payment integration.

SKILLS

- Javascript
- Typescript
- SQL & NoSQL
- Nodejs
- Express
- React
- Tailwind (CSS)
- Next.js
- Collaboration

CERTIFICATIONS

Responsive Web Design

FreeCodeCamp

Javascript Data Structure And Algorithms

FreeCodeCamp

WORK EXPERIENCE

Arc.dev

2025- PRESENT

Software Developer

- Launched a scalable gift card trading platform with real-time data flow and enhanced backend architecture, attracting over 100+ early users within 30 days.
- Automated user onboarding and administrative tools, reducing manual workflows by 50% and improving team efficiency.
- Deployed with CI/CD pipelines via Render and Vercel, ensuring zero-downtime updates and optimizing delivery time for features by 40%.
- Optimized platform performance by identifying and addressing key bottlenecks, improving load times by 30% and increasing user satisfaction.

F.5 Labs

2023 - PRESENT

Full-Stack Developer

- Built and deployed a responsive e-commerce platform, increasing mobile usability and improving user retention by 20%.
- Customized and optimized CMS plugins and integrated third-party APIs, cutting client delivery time by 30% and boosting system flexibility.
- Designed and implemented RESTful APIs with Express.js and MongoDB, resulting in a 20% improvement in system performance and scalability.

GoMyCode

Nov 2024 - Jan 2025

Full-Stack Developer

- Developed key features for the Patient Hub app using React and Node.js, streamlining the appointment booking process, reducing task completion time by 25%.
- Engineered secure APIs and implemented a JWT-based authentication system, improving login success rates and enhancing platform security by 35%.
- Collaborated with senior engineers to implement responsive design across 5 major devices, increasing user engagement by 25% and reducing bounce rates by 15%.
